Cambrian Blue Clay

It is called the Serbian blue clay of the Cambrian. Named therefore because it was formed in Siberian lakes during the Cambrian period, during the Paleozoic era (542-488 million years ago) Which makes it one of the oldest cosmetic clays and the rarest in the world. Its unique blue color comes from minerals and algae found in Siberian lakes.

This clay is known to be a natural exfoliant, filled with minerals with great healing properties, this clay is also known for its properties to cleanse, balance, illuminate the skin and also fade wrinkles and fine lines. Quite cleansing, but is considered relatively mild. Thanks to its anti-inflammatory, soothing and antibacterial properties, it can be used as a mask or scrub to relieve acne, eczema, psoriasis and certain other skin conditions.

These Cambrian Serbian blue clay masks and scrubs can also help soothe irritated skin, restore and renew the epidermis, it refreshes the skin, make it smooth and supple, stimulates blood circulation and improves skin cells metabolism by its regenerating properties and its anti-aging action.

Cambrian Blue Clay is ideal for making:

- soap
- bath bombs
- body products
- creams and lotions
- in compresses and poultices and more...
- face masks
- scrub
- face and skin care
- hair care

Uses

Clay per 454g of bath bomb mix:
0.5g Cambrian Blue Clay

Melt and pour soap: Clay mix per 454g of soap base:
1.5g Cambrian Blue Clay
15ml isopropyl alcohol 99%

Cold and hot saponified soap: Clay mix per 454g of soap base:
3g of Cambrian Blue Clay
30ml distilled water

As a mask:

Put Cambrian Blue Clay in a non-metallic dish, pour lukewarm water, stir until you get a creamy consistency, apply to your skin and leave on for 5-20 minutes, rinse and pat dry.

Recommendations

The dosage suggested above is for information only more or less can be used according to your recipes we suggest you always carry out final tests with your products.

The clay should be mixed with water before adding to the cold and hot soap.

This extra amount of water in your soap will help mix the clay into the soap paste and will also prevent the clay from cracking your soap.

More or less clay can be added to your bases to achieve the desired color.

This clay is a pale blue powder, which will give a blue gray - pale green color in your soap depending on the color of your oils.

This product is not intended to prevent, diagnose, treat or cure any disease.

For external use only. Our clays are intended for cosmetic purposes.

Under no circumstances do we recommend that they be considered as food or for medicinal purposes or medical application.

Store this product in a dry place away from direct sunlight.

Store it in an airtight container.

Never use a spoon or any wet or damp utensil to remove the powder from its container.

Avoid metallic instruments and dishes to avoid any reaction with the clay.

Keep the clay away from moisture.
